New Morocco Blue Barite

I've added a new [Morocco Update \(click here\)](#) featuring a small number of excellent-quality blue barite specimens from the Sidi Lahcen Mine, from beautiful cabinet specimens to super miniatures. These specimens are from a 2013 find of superb top-quality crystals and crystal groups. The pieces from this find have sharp crystals, with nice colour, excellent lustre and good transparency. The specimens in this update were selected for their aesthetic crystal arrangements and high quality (so many specimens from the Sidi Lahcen finds were quite damaged).

My usual reminder - prices on the website are in Canadian dollars, which trade at a good

(20-25%) discount these days, if you are thinking in (or used to browsing online minerals in) US dollar terms.
