Dakota Matrix Minerals
March 18, 2016

Hi Everyone,

We will be posting 36 minerals today at 6pm (US Mtn time). This update will focus on rare mineral species with some basic but nice cabinet specimens.Click Dakota Matrix to see the update.

Wulfenite - Greece   Andradite - Franklin   Kozyrevskite - Rus.

These minerals can be seen and purchased here: **Dakota Matrix**.

Our new website called **RockandMineralShows.com** will launch in about in **early April**. This website will map out **all rock, gem, and mineral shows from coast to coast for all FM and AFMS clubs and larger shows sponsored by promoters**. It will also map out rock shops, mineral museums, and geo-places. There will be all levels of membership from individual to club & society, business/dealer to big show promoter levels.

Newsletter; Please go to this page: **http://www.rockandmineralshows.com** to get an idea of the content and **sign-up for our newsletter**.

You will also be able to **sell** some of your garage material or duplicate specimens on this website in a Craig's List style venue. And believe me,

it will be at the most affordable cost, with the most bang for your buck of any website around. Users will simply pick a State and browse when and where the shows are held by zooming and panning the USA. Mapped shows will be marked by pins with the club website and dates. You will be able to better plan your mineral trips by coordinating shows and other places to visit. Dealers will have plenty of marketing opportunities with a dealer update section and real-time show photos.

Tom
