New from Russia

I've added a some great specimens in this new [Russia Update \(click here\)](#).

This update includes some older specimens, a superb Puiva axinite-(Fe) and a Dodo Mine quartz with anatase and brookite. Among contemporary specimens are intense blue azurites and a sharply-crystallized copper from the Rubtsovskoe Mine, a Second Sovietskiy Mine calcite and a sparkling datolite from Dal'negorsk. New finds include axinite-(Fe) from the Bor Pit at Dal'negorsk and beautifully twinned calcites from a new locality in the Dal'negorsk district, the Yushnoe Mine.

Hope you enjoy them!

Canadian and US Dollar

The currency disparity remains significant in favour of the U.S. dollar these days. My usual reminder - prices on the website are in Canadian dollars (if you are thinking in - or used to browsing online minerals in - US dollar terms).

For all new specimens at McDougall Minerals, see [New Specimens](#).
