New from Russia

I've posted some new specimens in this [Russia Update \(click here\)](#). The excellent Dal'negorsk fluorites are not recent production, as there haven't been crystals like this for a while. So, when I've been able to find good ones, I've acquired them sporadically over the last three years. These are super, transparent, colourless fluorite crystals, exhibiting up to five crystal forms. Among these pieces are a couple of very cool phantoms and overgrowths.

This update also includes some great calcite specimens, with some fascinating crystal forms, and some fine datolite specimens with sharp crystals.

Hope you enjoy them!

Coming Soon - Tucson Updates

There are lots of great new specimens from Tucson - they will be posted soon in upcoming updates.

Canadian and US Dollar

The currency disparity remains significant in favour of the U.S. dollar these days. My usual reminder - prices on the website are in Canadian dollars (if you are thinking in - or used to browsing online minerals in - US dollar terms).

For all new specimens at McDougall Minerals, see [New Specimens](#).

New Gmelinite and New Article

I've added some excellent gmelinite specimens from Two Islands and Five Islands, Nova Scotia, in the new [Nova Scotia Update \(click here\)](#). This update includes nice analcime and stilbite specimens as well.

I've also posted a new article on the blog, to give a better idea about these two Islands localities: [Mineral Collecting on the Islands - Bay of Fundy \(click here\)](#).

Hope you enjoy them!
