New Amethyst From Bolivia

I've added some great specimens from a new find in this [Bolivia Amethyst Update \(click here\)](#). These are beautiful glassy crystals – some doubly-terminated, and some exhibit a great reverse-sceptre habit.

The specimens were discovered by farmers, at the edge of a field area in Potosí, bordering hills.

Hope you enjoy these!

Canadian and US Dollar

The currency disparity remains significant in favour of the U.S. dollar these days. My usual reminder - prices on the website are in Canadian dollars (if you are thinking in - or used to browsing online minerals in - US dollar terms).
