# WEINRICH MINERALS

I continue to add new specimens to the website. This latest update consists of 100 fluorite specimens from Ireland at all price levels. Be sure to check out our [Latest Additions](#).

Special note - I have now added a special video feature for each specimen. A red banner to click on for a video of the specimen appears under the description field. I will eventually get "caught up" with this and all specimens will have videos. I think that the videos really help to show the specimen as it is, in true color and three dimensional.

This is a reminder that 116 new auction specimens are now available. This auction will close in evening of Tuesday, October 9, 2018 at 7 p.m. EST.

Highlights include:

- well crystallized copper from Bisbee
- lush green pyromorphite from France
- hot pink calcite from the Congo
- well crystallized copper from Ray Mine, Arizona
- aquamarine from Maine
- nice pyromorphite from Idaho
- crystallized brazilianite from New Hampshire
- Plus many others
