- Selenite with hour-glass shaped zoning from Great Salt Plains, Oklahoma
- Prehnite with Calcite from Millington Quarry, New Jersey
- Corundum var. Ruby from Mozambique

Again this week, many minerals posted now have videos embedded on each page. Videos are becoming the standard for selling minerals. A video shows the mineral in the hand, to give scale. As the mineral is rotated you can see the overall shape. As the light reflects off the surfaces, you can assess to luster of the crystal faces.

See the new minerals at:
